DETAILED ACTION

1. This Office action is in response to the applicant's communication filed on 3/4/11.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 52,54-56,58-72,74-76,78-95 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. During the prosecution history, the claims were amended to recite that the filtering region comprises "only a single layer of filter membrane". However, upon review of the written disclosure and the originally filed claims, the examiner is not able to find support for this limitation. Note that this limitation is viewed as a "negative limitation", and that any negative limitation or exclusionary proviso must have basis in the original disclosure. The mere absence of a positive recitation is not basis for an exclusion. MPEP 2173.05(i).

Response to Arguments

4. Applicant's arguments with respect to the rejections of the claims under 35 USC 112, first paragraph, have been considered but are moot in view of the new ground(s) of rejection.

5. The applicant argued that the specification discloses that the filter has a membrane, and that this teaching provides support for a single membrane. However, the claim limitation is more specific than just "a single membrane". The claim language specifically recites "only a single layer of filter membrane". The term "only" is viewed as a negative limitation since it prevents the filter from having more than one layer. However, this specific teaching that the filter membrane is only a single layer is not found in the specification. Therefore, it still constitutes as new matter.
6. The 103 rejections have been withdrawn in view of the attorneys statement that patent 6840950 were, at the time the invention was made, owned by the same assignee.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
